

SQL Server Check Constraints Case-sensitivity

(or lack of it)

```
create table TestCase(  
    fname varchar(20) check (fname = 'Alan')  
)
```

```
insert into TestCase (fname)  
values('Alan')  
go
```

(1 row(s) affected)

```
insert into TestCase (fname)  
values('ALAN')  
go
```

(1 row(s) affected)

```
update TestCase  
set fname = 'alAN'  
where fname = 'ALAN'  
go
```

(2 row(s) affected)

```
select *  
from TestCase
```

fname

alAN

alAN

(2 row(s) affected)
